Linux Professional Institute (LPI) certification doesn't claim you have the skills, it proves them

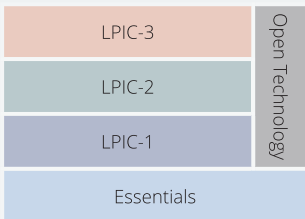

Verified credentials get you to the top of the resume pile and on recruiter hot lists. Best of all, it's the quickest way through the HR firewall.

LPI's vendor-neutral certifications show open source software's versatility. When you pass these certifications, you won't be limited to one particular vendor technology, but will be capable of working with multiple open source technologies – mirroring the environments you will experience on the job.

Because we provide detailed exam objectives, you can spend your time preparing for the exam efficiently. As well, our certifications are valid for 5 years; longer than most.

LPI has certified professionals worldwide. It's the internationally recognized standard, which means you have a recognized skill set that is in demand throughout the world, and a career that can travel with you.

LPIC-3

Mixed Environments | Security | Virtualization and Containerization
High Availability and Storage Clusters

Linux Professional Institute (LPI) certified professionals do better at their jobs. They're more likely to get higher paying jobs, advance their career, have more choices, flexibility and skills portability. This is no surprise, given LPI that is the global certification standard and career support organization for open source professionals.

Enterprise-level Linux certification

The LPIC-3 certification is the culmination of Linux Professional Institute's multi-level certification program. LPIC-3 is designed for the enterprise-level Linux professional and represents the highest level of distribution-neutral Linux certification within the industry.

To become LPIC-3 certified, you must have an active LPIC-2 certification and pass at least one of the four available LPIC-3 exams below:

- Mixed Environments (300)
- Security (303)
- Virtualization and Containerization (305)
- High Availability and Storage Clusters (306)

The 90 minutes exams are 60 multiple-choice and fill in the blank questions. They are available in English and Japanese.
