Linux Professional Institute (LPI) certification doesn't claim you have the skills, it proves them

Verified credentials get you to the top of the resume pile and on recruiter hot lists. Best of all, it's the quickest way through the HR firewall.

LPI's vendor-neutral certifications show open source software's versatility. When you pass these certifications, you won't be limited to one particular vendor technology, you will be capable of working with multiple open source technologies – mirroring the environments you will experience on the job.

Because we provide detailed exam objectives, you can spend your time preparing for the exam efficiently. As well, our certifications are valid for 5 years; longer than most.

LPI has certified professionals worldwide. It's the internationally recognized standard, which means you have a recognized skill set that is in demand throughout the world, and a career that can travel with you.

View summary of LPI exams

LPI is a non-profit organization

Linux Professional Institute (LPI) is the global certification standard and career support organization for open source professionals. With more than 200,000 exam holders, it's the world's first and largest vendor-neutral Linux and open source certification body. LPI has certified professionals in over 180 countries, delivers exams in multiple languages, and has hundreds of training partners.

Our purpose is to enable economic and creative opportunities for everybody by making open source knowledge and skills certification universally accessible.

For more information on how to get LPIC-1 certified, to find training materials and instructors, or to purchase an exam voucher, visit [lpi.org](https://lpi.org).

LPIC-1  
Become Linux certified

Linux Professional Institute (LPI) certified professionals do better at their jobs. They're more likely to get higher paying jobs, advance their career, have more choices, flexibility and skills portability. This is no surprise, given LPI that is the global certification standard and career support organization for open source professionals.

# Ramp up your career with Linux certifications

LPIC-1 is the first certification in Linux Professional Institute's multi-level Linux Professional certification program. LPIC-1 will validate your ability to perform maintenance tasks on the command line, install and configure a computer running Linux and be able to configure basic networking.

There are no prerequisites for the LPIC-1 certification.

The 101 and 102 exams are available in English, French, German, Italian, Portuguese (Brazilian), Spanish (Modern), Chinese (Simplified), Chinese (Traditional), and Japanese.

To pass LPIC-1, you should be able to: work at the Linux command line, perform easy maintenance tasks, help users, add users to a larger system, backup and restore, shutdown and reboot, install and configure a workstation (including X), and connect a Linux workstation to a LAN and the Internet.

To become LPIC-1 certified, you must pass both the 101 and 102 exams.

LPIC-1 is one of the most recognized Linux certifications, globally
